Last month, the Israeli military said that it was, for the first time in 15 years, planning for the possibility of West Bank separation. "This week, we will publish all of our plans for the defense of the State of Israel." Netanyahu said, in a news conference in Davos, Switzerland, where the World Economic Forum convenes. The prime minister did not name the defense plan, but said he was "not talking about that yet" and that he wanted to "leave the door open." Q: Webdriver: get current method name on assert I am currently working on testing a web application. I am using the Webdriver.io framework and trying to understand if there is a way to get the current method name on an assert statement. For example if I execute: 3da54e8ca3
